Bisagni Environmental Enterprise
安生态（建筑技术咨询公司）创始人兼总经理

Alessandro Bisagni is the Founder and Managing Director of BEE – a company that focuses on green building consulting and trading of sustainable construction materials. The company specializes in building simulations (primarily energy, lighting, thermodynamics, and acoustical models), commissioning, and LEED / HK BEAM / China 3-Star Certifications. Alessandro has managed over 60 LEED projects, across 12 countries, with a combined GFA of over 20 million square feet. Among these are the Haworth Beijing Showroom (the world's first ever LEED version 4 Certified project), the eco-resort Naked Stables (to date China's only LEED Platinum hotel), and the Hines Jing'An commercial tower (which is seeking LEED Platinum, making it one of the tallest Platinum Certified structures in Asia upon completion). His company is also responsible for rolling out an extensive LEED Certification plan in Asia Pacific for retailers such as Chanel, Gucci, and Starbucks. Alessandro is also the co-Founder of the Green Building Professional Partnership (GBPP) China, it is an industry group who's mission is to spread green building knowledge across Mainland China and build ties between local LEED practitioners and the USGBC. Via this group he is also the nominated Mainland China Representative to the USGBC's LEED International Roundtable made up of more than 30 member countries.

Alessandro graduated from McGill University's School of the Environment with a specialization in Environmental Economics and Urban Planning. He has diverse experience working in China, ranging from market entry strategy and company start-up, to eco-masterplanning, sourcing, and more. Before opening BEE, Alessandro was an Environmental Consultant for the international engineering firm ARUP, based out of their Hong Kong and Shanghai offices. He has over a decade's worth of experience working and studying in the field of sustainability from different angles, with the past 8 years specifically in China.
